

CarCare

Daily Car Cleaning at Your Doorstep

A subscription platform for hassle-free car cleaning in residential societies.

Founder: Manoj Kumar | Pilot City: Delhi NCR

Made with GAMMA

The Chaos of Daily Car Cleaning

Time Poverty

Urban residents often lack the 20 minutes needed for daily car maintenance, leading to neglected vehicles.

The Trust Gap

Current car cleaners are frequently unverified, raising concerns about reliability and safety within residential communities.

Transparency Issues

Lack of proof of service, cash-only payments, and zero accountability result in a non-transparent and inefficient system.

Inconsistency

Without standardised pricing or quality control, service quality and cost vary greatly, leading to dissatisfaction.

Insight: Car cleaning is a daily essential service stuck in an unorganised, analog era.

Why Now? The Untapped Opportunity

2 Crore+

Vehicles in Delhi NCR

A massive, concentrated market for car cleaning services.

₹500-...

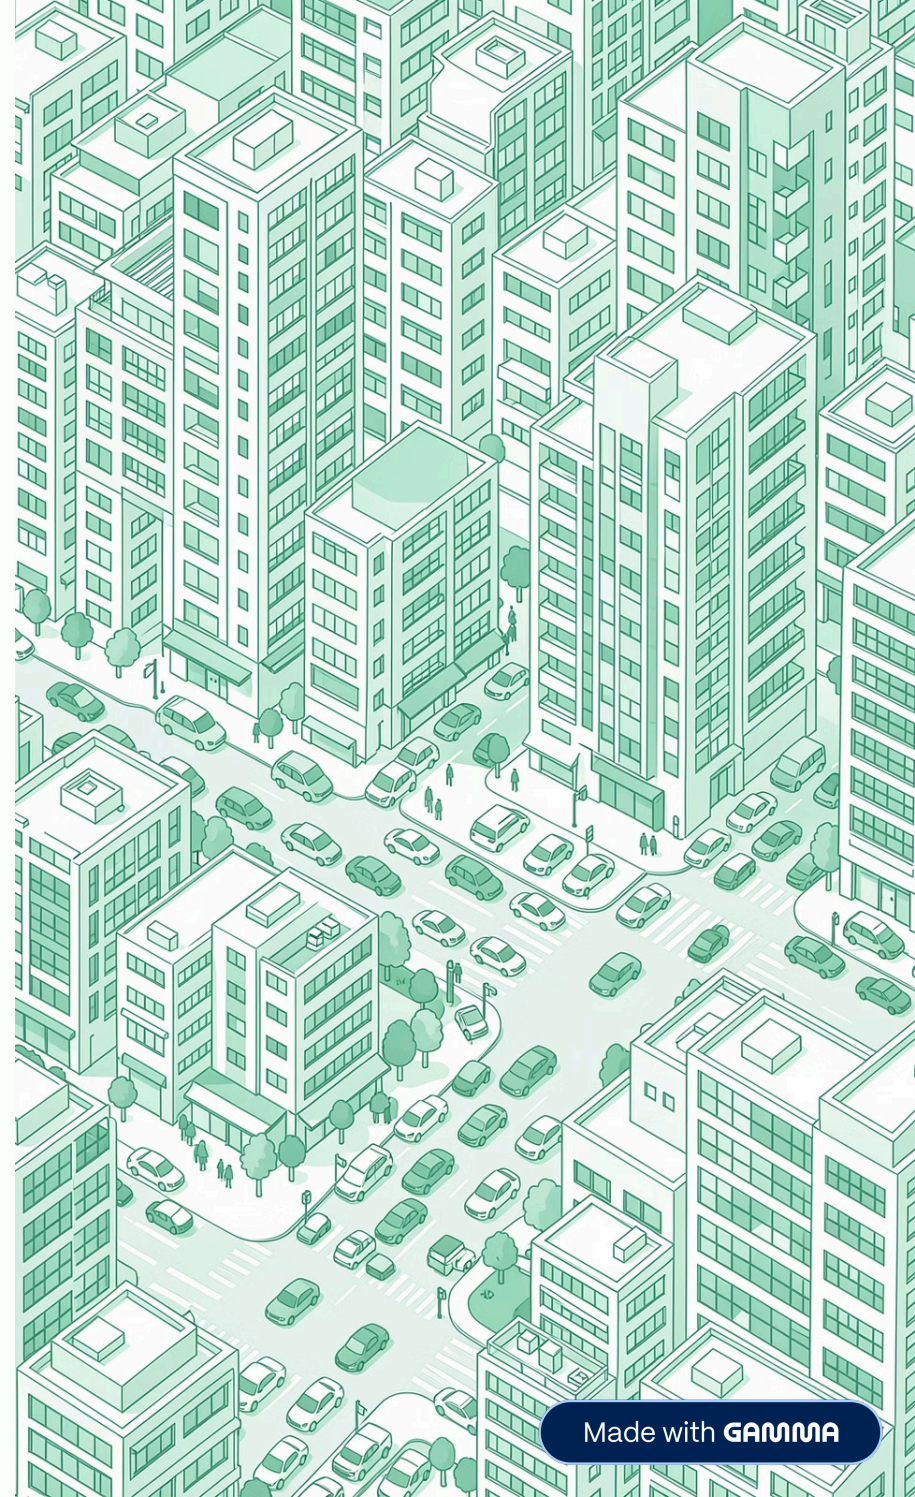

Willingness to Pay

Residents are ready to pay monthly for convenience and quality.

Key Advantages

- Captive Audience: High-rise societies offer a high density of target customers.
- High-Frequency Service: Ensures predictable, recurring revenue.
- Zero Digital Competition: A wide-open space for digital disruption.

This confluence of factors creates an ideal environment for CarCare's success.

CarCare: Simple. Reliable. Trackable.

Verified Workers

Ensuring safety and peace of mind for residents in gated communities with thoroughly vetted personnel.

Digital Proof

Daily photo uploads provide transparent proof of service, eliminating doubts and enhancing trust.

Automated Payments

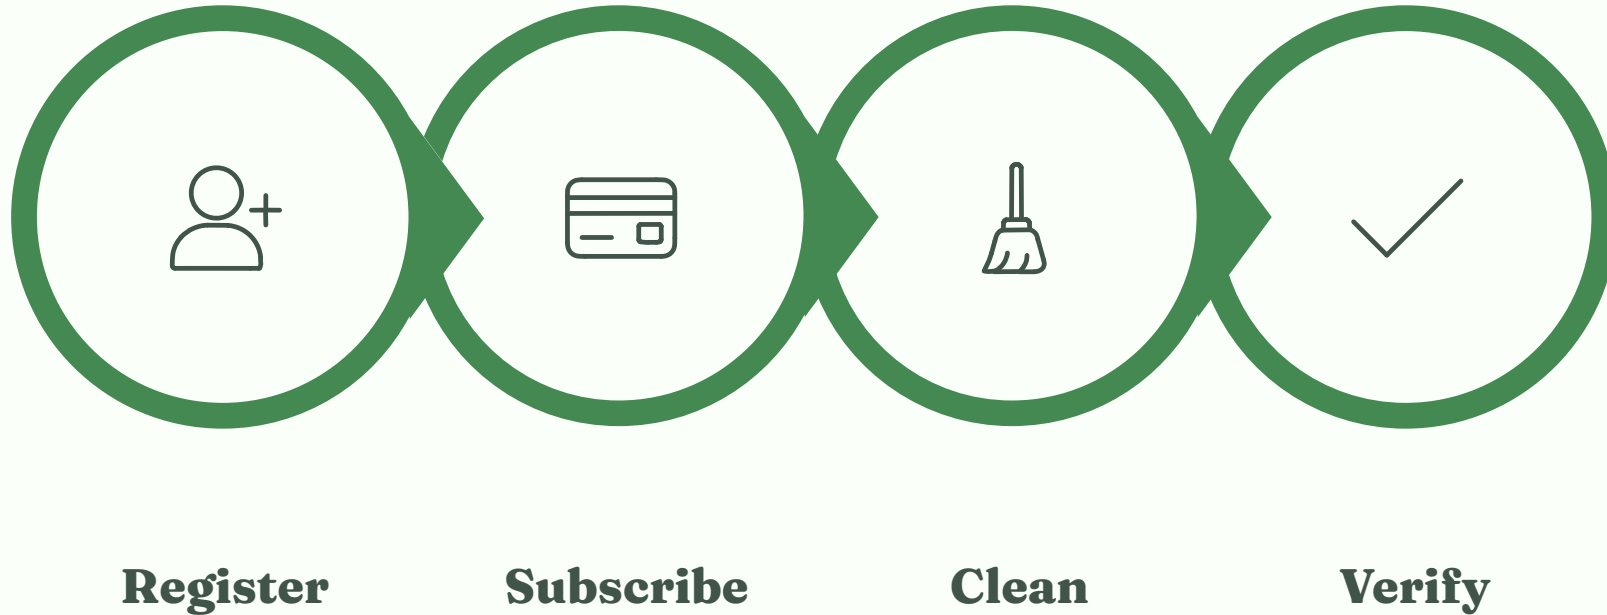

Hassle-free, cashless transactions via subscription, removing the need for daily cash exchanges.

Consistency

Maintaining professional standards with every clean, ensuring a consistently pristine vehicle every morning.

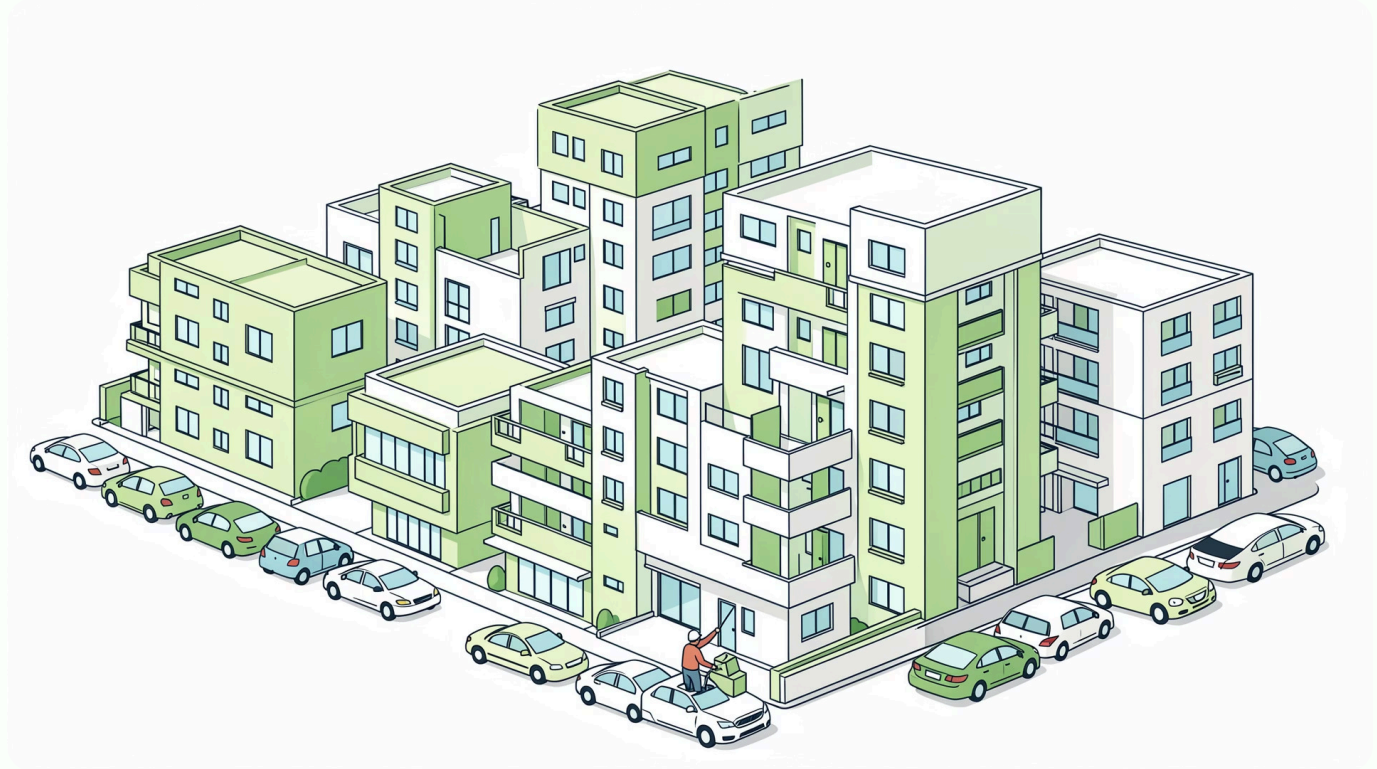

How It Works: Our Seamless Process

Our intuitive app and streamlined process ensure a hassle-free experience from start to finish.

Scalable & Efficient Operations: The Society Cluster Model

Our innovative "Society Cluster Model" optimises worker productivity and ensures efficient service delivery.

→ Targeted Focus

We concentrate on residential societies with 30-50 cars, ensuring a high density of customers.

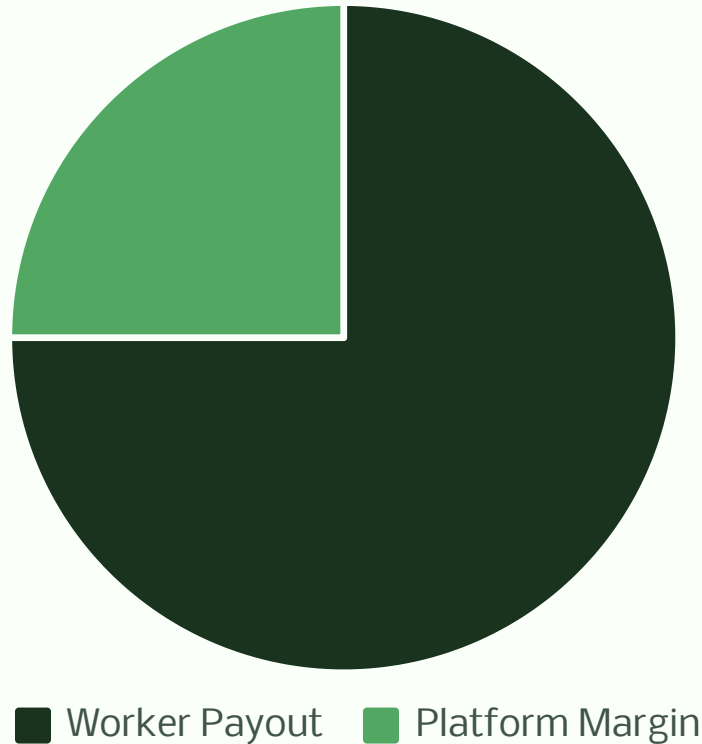

→ Unit Economics

Each worker is assigned to a single society, maximising their efficiency and reducing travel time.

→ Peak Efficiency

A worker can clean all assigned cars within a compact 2-3 hour window, ensuring timely service.

Robust Revenue Model

Our clear revenue model ensures sustainability and profitability:

- **Monthly Subscription:** ₹600 per car
- **Worker Payout:** ₹450 per car (75%)
- **Platform Margin:** ₹150 per car (25%)

Projection: 20 Societies (1,000 cars) = ₹1,50,000 Monthly Margin

Cutting-Edge Technical Architecture

1

Frontend

Developed with **Flutter** for seamless cross-platform (iOS/Android) user experience.

2

Backend

Powered by **FastAPI / Django**, ensuring a robust and scalable foundation for our services.

3

Database

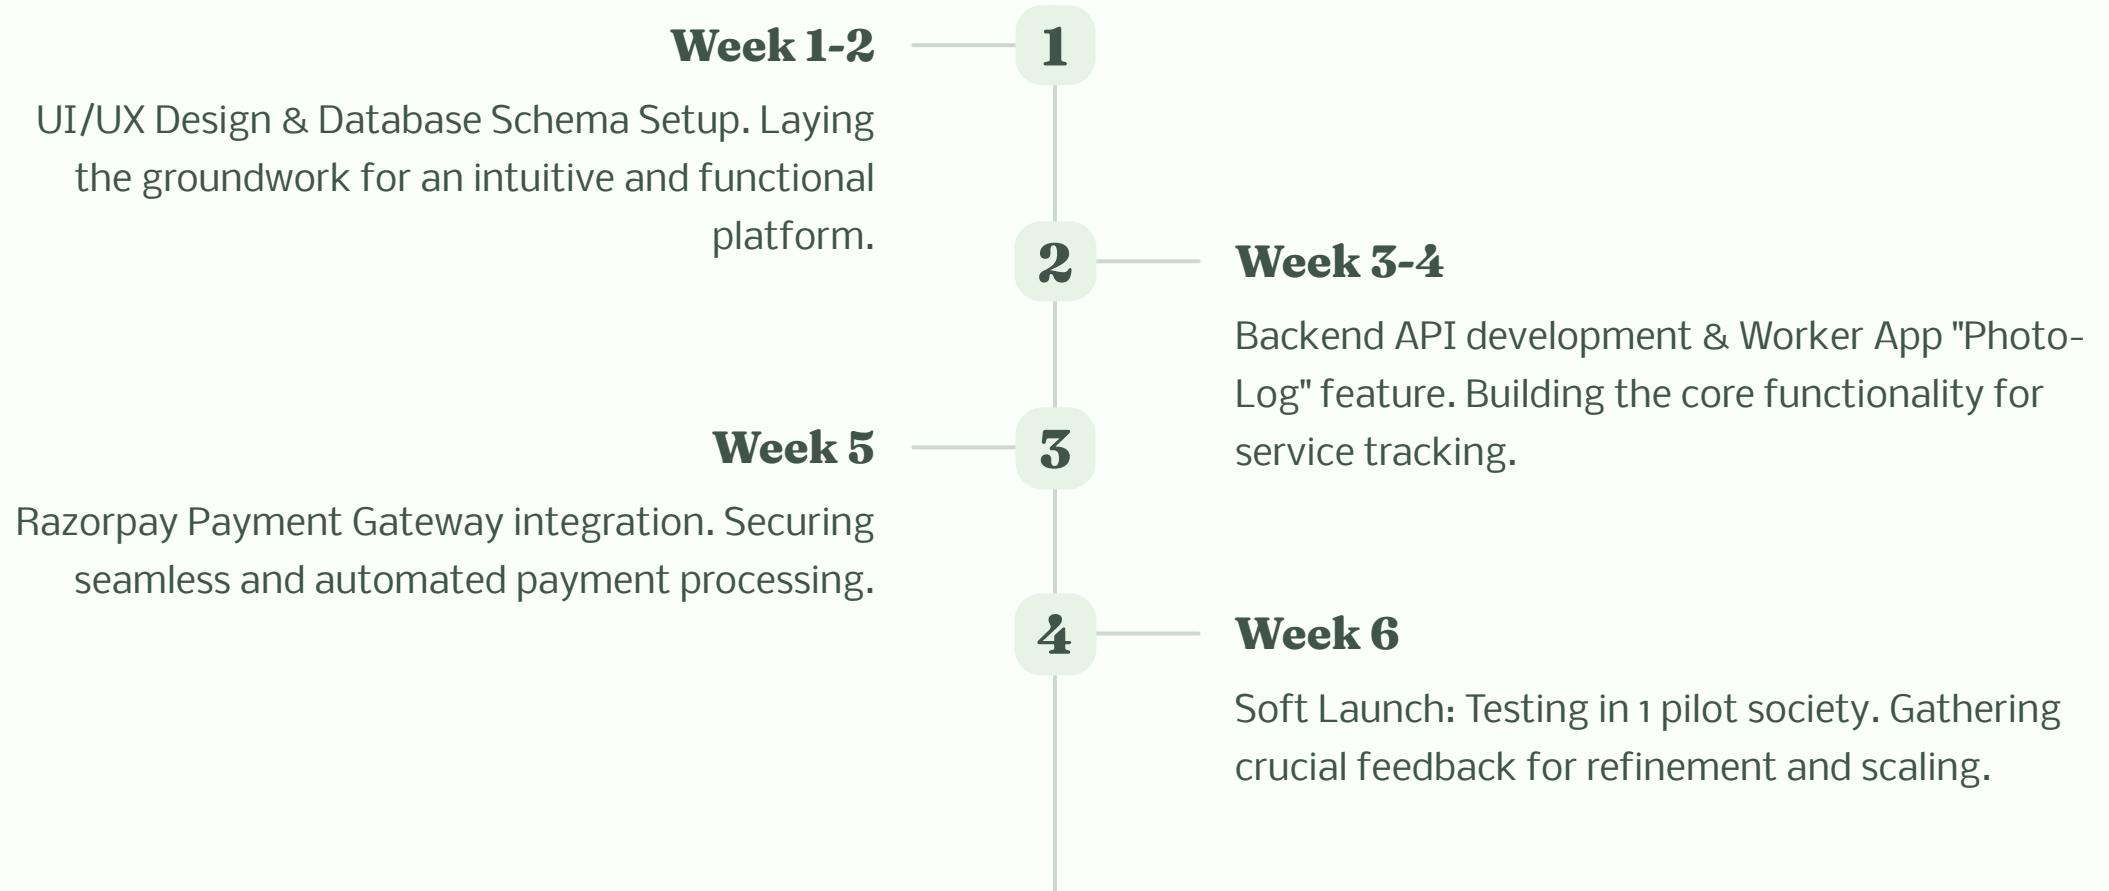

PostgreSQL + Firebase for reliable data storage and real-time notifications, keeping users informed.

4

Payments

Integrated with **Razorpay Subscription API** for secure and automated recurring payments.

Implementation Roadmap: 6-Week Sprint

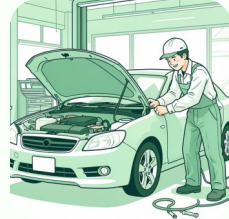

Future Scope: Expanding CarCare (V2)

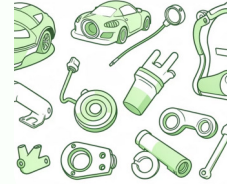

Vertical Expansion

Diversifying services to include bike cleaning and detailing, tapping into a broader market.

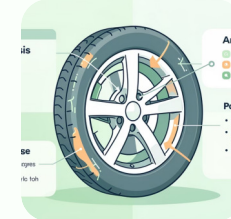

Service Marketplace

Connecting users with verified mechanics for various car services, creating a one-stop solution.

E-commerce Integration

In-app sales for essential spare parts like wipers, fluids, and air fresheners, enhancing user convenience.

AI Integration

Analysing car photos to report issues automatically (e.g., "Your tyre looks low"), proactively assisting users.

Pilot Goals: 5 Societies | 200 Cars | ₹30k Monthly Margin

Join us in digitising India's largest unorganised service sector.
